

A wide-angle photograph of a modern hospital building at night. The building is a large, light-colored structure with many windows, some of which are illuminated. The words "Erasmus MC" are visible on the top left of the building. In the foreground, there is a paved area with some trees and a few parked bicycles.

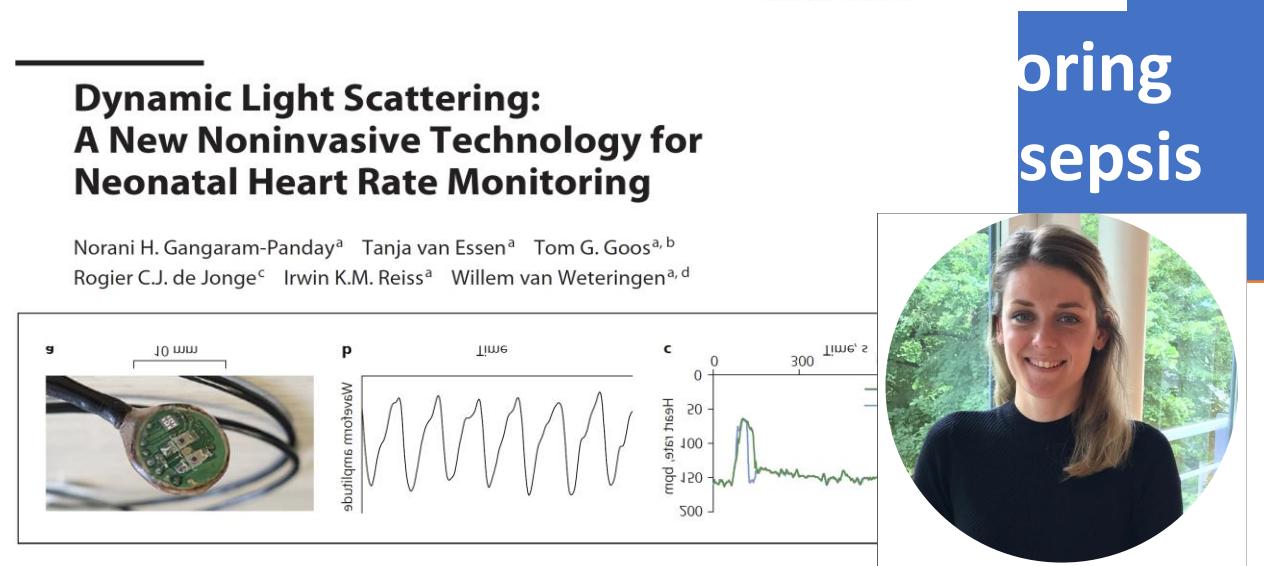

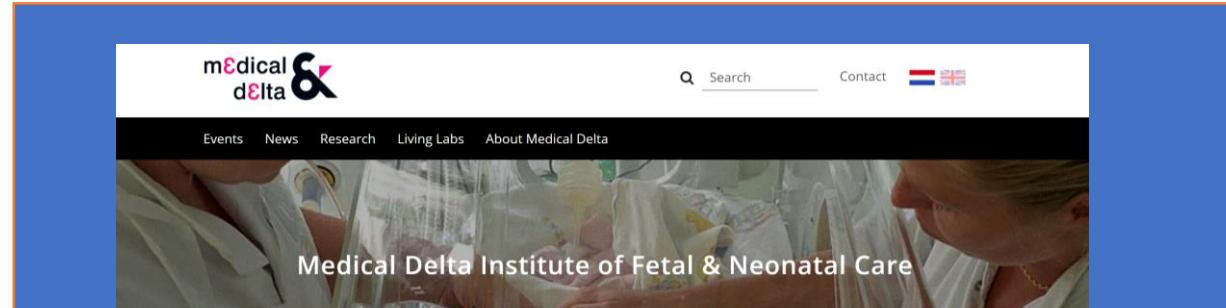

„Human Neonatal Care Lab“

Using innovative and advanced technology to optimize developmental opportunities of extreme preterm infants

A photograph of Stevie Wonder performing on stage. He is wearing a black baseball cap and sunglasses, smiling broadly. He is wearing a black jacket with large, colorful, metallic letters spelling out "FREEDOM". A microphone stand is positioned in front of him. The background is dark with some purple stage lights.

Stevie Wonder tells fans he will have kidney transplant (BBC, 7th July 2019)

Better Soundscapes

With an evidence-based design approach, our aim is to ensure

- Healthy start to hearing
- Parenting without anxiety
- Smoother workflows

Dr. Elif Ozcan
Director - Critical Alarms Lab

Issues with NICU sounds

- one unit with 8 babies can produce up to 5000 alarms in 24 hours
- peak sound levels can reach up to 125 dB
- premature babies show signs of PTSD towards sounds in later stages of life
- families develop PICS - post intensive care syndrome

Better

With an evidence-based design

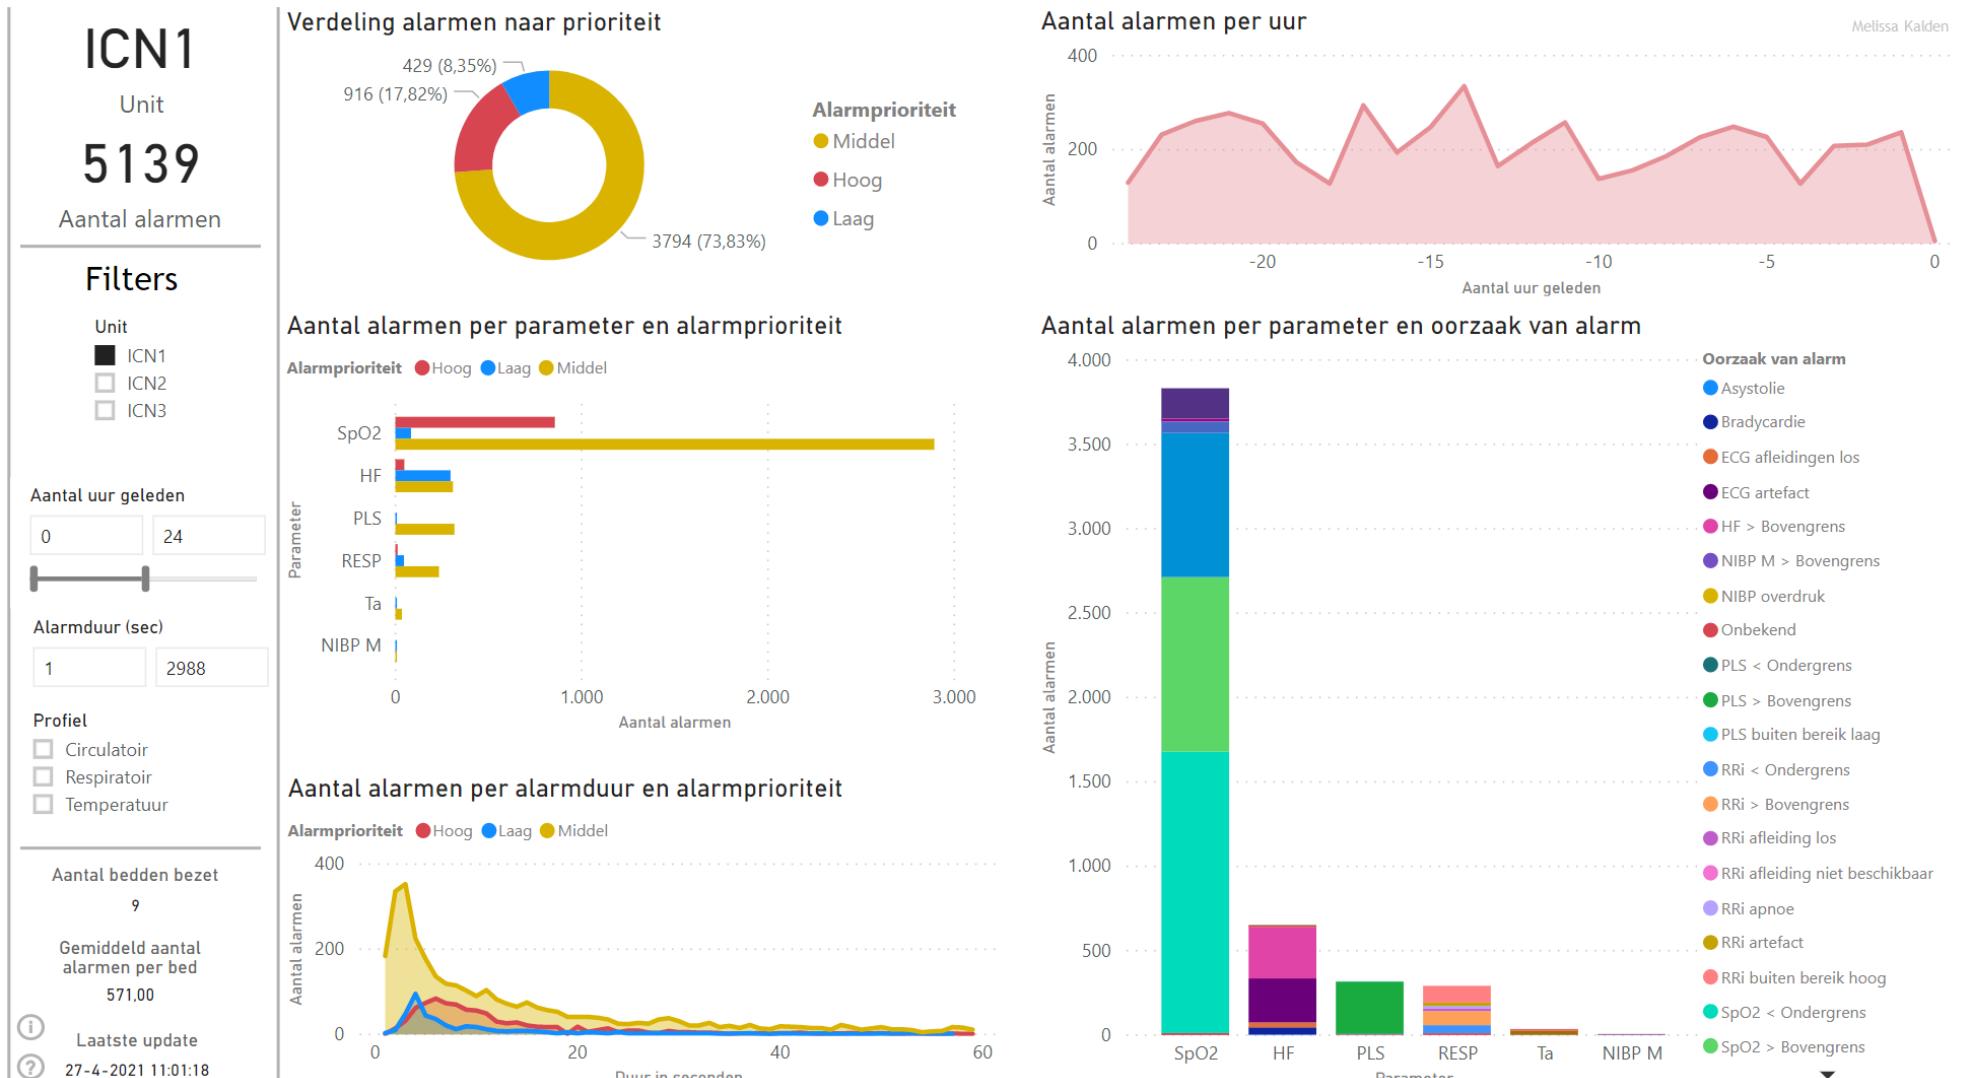

- Healthy start to life
- Parenting without fear
- Smoother working lives

Dr. Elif Ozcan
Director - Critical Alarms Lab

ICN Alarmdashboard

Conclusion:

- The “*Erasmus MC -Neonatal Care Lab*” is a platform using innovative and advanced technology to optimize developmental opportunities of extreme preterm infants
- “*Healthy Start*” enable us to join forces and to bring expert from different disciplines together to develop, study and implement advanced technology in neonatal intensive care
